Adventure Mode is a game mode in Hyrule Warriors.[1] Map Adventure Mode consists of a Map grid, based on The Legend of Zelda's Hyrule map, with each block of the Map containing different selected missions. The Map is zoomed out completely to show the entire landscape. The player moves an 8-Bit Version of their Warrior across the different missions until they choose what mission they want to challenge. Each mission consists of a preset challenge, ranging from normal story battles, to quiz missions, boss rushes and other challenges that differ from the regular gameplay. Missions can be playable as many times as the player wishes. To open more blocks on the Map, other missions have to be completed before they may become accessible. Sometimes a mission requires to be cleared in a certain rank before they may open to the next block. Wavy, black lines on the Map serve to border between blocks, and in order to get to the blocks they obstruct, missions have to be completed around them. Some Battles restrict which Warriors or Weapons can be used in them. In these cases, it is necessary to have unlocked the Warrior and/or Weapon required for the Battle to be able to play it. Some Missions have special rules attached to them. In the Twilight Map, a special rule is shown as, "No Focus Spirit!", which makes no Magic Jars appear so the warrior cannot fill their Magic Gauge. Victory Ranks and Rewards When finishing a mission, the player will be graded on how well they did on a scale of "A", "B", and "C" (or "S", "A", and "B" in certain game regions). Each Battle requires Warriors to earn a specific Rank in an adjacent Battle in order to be unlocked, and a large number of missions require the player to get an "A" rank to earn a specified reward; except for Costumes, these rewards also require that their designated owner be the character used to get the "A". The exact requirements for an "A" rank vary by Battle, but are generally similar. A mission's requirements may include up to Categories, from "K.O"., "Clear weather" and "Damage taken." The "K.O." The requirement is 3 for "Fight for the X quiz!" Challenge battles and 1,200 for adventure battles. The "clear time" requirement is 7 minutes for most challenge battles and 15 minutes for adventure battles. The "damage taken" requirement varies between 4,000 (10 hearts), 5,000 (12 hearts and hearts), 8,000 (20 hearts), or 10,000 (25 hearts), depending on which section of the map the battle is located on. As in Legend mode, Legend mode, the Player also receives a rupee bonus because they performed so well in each category. On the Grand Travels map, there are three element cards that, when used, activate a captain's power that increases the rank gained later in battle in each of the three rank categories. The overall battle range is calculated by averaging the ranges in the applicable categories and rounding. Therefore, a "a" range on "K.O". and a "c" range on "damage taken" will result in a "B" range for the mission, while a "A" range on all parameters is required for the mission. Each map in Adventure mode awards medals for completing the map, reaching an "A" rank in all your battles and finding all the heart pieces of the map, heart containers, Skulltulas, warriors when applicable and sealed weapons. Item Cards Main article: The Item Card Item cards are items that can be used to unlock new rewards or reveal hidden enemies in missions. If the player uses "Search" on the map screen, the map will zoom in and an element card can be used. Item cards are not always needed to unlock a stage, as most item cards only unlock new rewards. In some cases, an item card is required to "reveal hidden enemies" Play the stage, which makes the letters of elements not completely optional. In Hyrule Warriors: Definitive Edition, an item card store was added. This allows warriors to buy article cards that have previously obtained. Network links if they connect to the Nintendo network during the game, the network link sometimes on the map screen. The network links look similar to the link but with black, blue, light blue, purple or red clothing. Once a network link appears, the battle in the square you are in can be played for an additional reward, including weapons and materials. Completing a Friend'³ mission gives the link owner a "friend bonus" of Rs. 100,000 and a temporary bonus for the EXP³s earned. Other Maps Rewards Map, the rewards map will be unlocked after completing an illustration ³ collecting the 20 pieces of illustration that ³ launched defeating Gold Skulltulas. The rewards map is significantly smaller than the other maps, and adventure battles can only be played by completing a ³ illustration. Each battle of adventures is inspired by the content of the ³ that unlocks it, such as the illustration of "true partners³" who unlock a challenge that requires choosing a warrior to ally. The map only contains new costumes as rewards. Master Quest Map, the Master Quest map is included with the Master Quest DLC Pack. ³ [Note 1] The Master Quest map provides new quests and challenges, but with additional clauses that limit the warriors' abilities; as healing, protection³ or elements are not allowed, in addition to the regular mission'³ objectives. The map contains rewards for CIA, Volga and Wizzro playable characters, along with new costumes and additional rewards for other playable characters. The map is based on the Hyrule Legend of Zelda Second Hyrule map. The crepuscular map is included with the Twilight Princess DLC package. The Twilight map provides new missions and challenges in a slightly smaller map, as well as additional new art cards based on Twilight Princess art. The map also has warp portals to move to other sections of the sallatab sallatab ne sogimene sol a ratorreD .oregil otnemele ed atejrat al ed arutor al noc ranimile nedeup es salusuıÃlc satsE .sorerreug sol ed sedadilibah sal natimil euq selanoicida salusuıÃlc nad sel y n³Ãisim al ed sociasom satreic nerbuc euq olucsºÃperc ed sebun omoc Ãsa have a higher probability of producing two drawn articles, with a higher probability that at least one article is a bag of material. The Map contains new "CrepÃsculo" costumes for all characters except Twili Midna, several Containers of CorazÃ³n and six new 8-Bit weapons. The map is an 8-bit replica of Hyrule overworld by Twilight Princess. The Terminal Map is included in the Majora's Mask DLC package. The terminal map provides new quests and challenges in a Majora Mask Terminal based map, and includes new additional element cards based on game elements. The Map has a time limit caused by the Moon cavity that restores the Map after a certain amount of time has passed. The counter starts initially at 3, but for each subsequent reset, it starts at 72. Whenever a battle square on the Map is finished or otherwise finished, the counter drops one. This counter can be manipulated by selecting element cards³ and the map also includes statues of baho that protect certain sections of the map from ³ reset. A new section ³ the Map can be revealed on the Moon if the Four Giants are saved on the Map. Complete the final battleground on the Moon and eliminate the time limit, allowing the Terminal Map to be completed without a counter. Defeating enemies in battles will have a greater chance of producing two candid objects, with a greater chance that at least one object is a Gun Bag. The Map contains new "Mask" costumes for characters, several Containers of CorazÃn³ and new 8-Bit weapons. Great Sea Map The Great Sea Map is included as part of Hyrule Warriors Legends and Hyrule Warriors: Definitive Edition and provides new missions and challenges in a map based freely on The Wind Waker's Great Sea.[2] nahcul nahcul odnauc sorerreuG sol a natlucifid euq ,raM narG led salgeR sal noc sazalp eneitnoc apaM lE .stib 8 ed socrab sol ne necerapa seretcarac ed sonoci sol ,ona©Ãco neneitnoc euq allatab ed sodardauc sol nE]3[.samra y sejart soveun raeuqolbsed nedeup es ednod salsi sairav noc That square. The effect of the rule depends on the enemy or obscure is in the square of the map and each enemy or obscure can be defeated/dissipated by a different element letter. Maper Wind Waker Map The Master Wind Waker Map is included with the Master Wind Waker DLC Pack, but is not found in Hyrule Warriors. It is an exact copy of the great map of the sea in design but with a different start mosaic. In addition to the great rules of the sea of the Great Map of the Sea, the Master Wind Waker map also has infinite night rules, [4] similar to the Master Quest Master Master Master rules. The dark rule of this map is in a battle square adjacent to the initial position, but the warriors must cross the map to obtain a hook element letter to access that battle square. This is the only map with rewards for Medli in Hyrule Warriors Legends. The map of the island of Kohold, the map of Koholint island is included with the Link Awakening DLC package, but is not found in Hyrule Warriors. It is the most small map, with a battle less than the end map, and as the name implies, it is based on Koholint Island from the link awakening. This map has eight ÓTEMS cards based on sirens instruments, which can be used to dissipate nightmares and apply a siren power throughout the map for three battles. After each instrument is used for the first time, an egg counter will increase in one. Once the egg counter reaches eight because the eight instruments have been used, the wind fish will wake up, dissipating all nightmares and allowing the dark rule to get rid of the square of the map with the egg of the windfish. [5] The true power of the instruments will also be unlocked, allowing the elements of elements to be used in any square and increase the duration of the power of the instrument to six battles. This is the only map with para Marin. Mapa de Grand Travels El mapa de Grand Travels se incluye con el paquete Phantom Hourglass & Spirit pistas DLC, pero no se puede jugar en Hyrule Warriors. As Lorule is fragmented and separated by abysses, Warriors must travel through multiple fissures to access the entire Lorule. Also present in the Lorule Map is the Junta de Ravio, which shows the active powers of Nice. Whenever an element card is used, a positive effect is added to the board, and that effect will affect the entire Lorule map until it is overwritten. Two Powers can be active at the same time. Using an element card with a third power will overwrite both active powers. The Dark Ruler is located in Lorule, and is as accessible as any other – no special requirements are needed to unlock it. This is the only Map with rewards for Ravio and Yuga.
